DETERMINING THE NUMBER OF CLUSTERS

Optimal Cut-off

Identified **three distinct clusters** based on dendrogram structure.

Segment size

	Population	Segment 1	Segment 2	Segment 3
Size	52	30	8	14
Relative size	100%	58%	15%	27%

Segment size.

SEGMENT SIZES

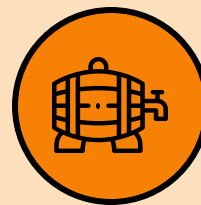

SEGMENT 1: 58%

Largest segment,
representing the **majority**
of consumers.

SEGMENT 2: 15%

Smallest segment,
offering niche market
opportunities.

SEGMENT 3: 27%

Moderate-sized segment
with distinct
characteristics.
